Penguin body mass

Your name here

Data

```
clean <- read.csv("data/processed/penguins_clean.csv")

# keep one species: filter out Adelie and Chinstrap
gentoo <- subset(clean, species == "Gentoo")
```

After removing incomplete rows, there are 333 penguins in the data. 119 of them are Gentoo penguins, which is the species we look at here.

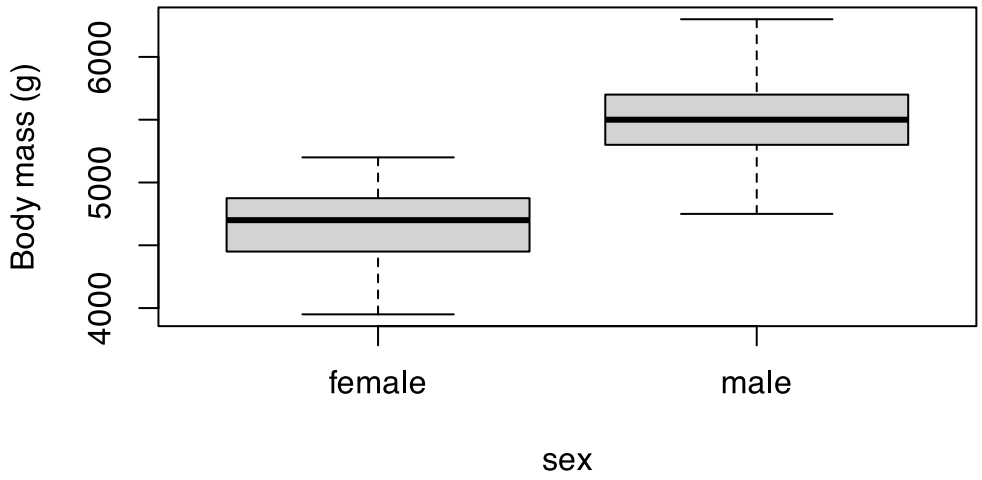
Results

The mean body mass of Gentoo penguins was 5092 g.

```
aggregate(body_mass ~ sex, data = gentoo, FUN = mean)
```

```
     sex body_mass
1 female  4679.741
2   male  5484.836
```

```
boxplot(body_mass ~ sex, data = gentoo, ylab = "Body mass (g)")
```



Body mass (g)
4000
5000
6000
